PERSONAL SUMMARY

BS Information Technology student specializing In Mobile and Internet Technologies at NU-Fairview, seeking an IT internship to apply technical Knowledge and gain practical experience, with experience in academic UI/UX and web development projects. Familiar with interface design, prototyping, user research, and front-end technologies. Creative, adaptable, and eager to develop effective digital solutions while gaining professional experience.

SKILLS

TECHNICAL SKILLS

- **Design:** Figma, wireframing, prototyping, user flows, UI/UX fundamentals
- **Programming and Web:** HTML, CSS, PHP, C++, Java, Python
- **Tools and Platforms:** Android Studio, Cisco Packet Tracer, Microsoft Office
- **Database:** SQL and database fundamentals

PROFESSIONAL SKILLS

- Communication, teamwork and collaboration, problem-solving, project coordination, time management, adaptability, attention to detail, research and analysis.

PROJECT EXPERIENCE

Recyc-Eat: An Automated Recyclable Waste Segregation and Food Reward Redemption Kiosk for Barangay Santa Monica
UI/UX Designer and Hardware Developer

- Contributed to the design of a kiosk experience that connects recyclable waste collection with points-based food voucher redemption.
- Helped plan user-facing interface elements and the interaction flow for recyclable submission and reward redemption.
- Collaborated with team members on hardware and system development for the community-focused project.

ClinicSense: A Web-Based Clinic Management and Appointment System for Estrellas' Homecare Clinic
Full-Stack Developer

- Contributed to front-end and back-end development of a web-based clinic management and appointment system.
- Designed interface elements with an emphasis on clear navigation and ease of use.
- Worked with database structures and SQL to organize clinic-related records and information.
- Researched user and system requirements and collaborated with teammates to test and improve the system.

SuitsMe Mobile Application
Project Manager/Front-End

- Helped plan and develop a mobile application for organizing and managing a digital wardrobe.
- Designed front-end screens, user flows, and layouts focused on usability, intuitive navigation, and visual consistency.
- Coordinated team tasks, monitored project progress, and collaborated on functionality and user-experience improvements.

Circle Coffee: An Online Ordering System and Table Reservation System
Front-End Developer

- Designed and developed front-end interface elements for an online ordering and table reservation system.
- Created layouts and navigation for browsing products, placing orders, and making reservations.
- Applied basic UI/UX principles and collaborated with teammates to improve usability and the overall customer experience.

iKnow: Mobile Application for Emergency Precautions
Front-End Developer

- Designed the proposed mobile application interface and user flow.
- Proposed features such as location sharing, safety status updates, weather information, and a panic button.

EDUCATION

BS Information Technology with specialization in Mobile and Internet Technologies
National University - Fairview
Quezon City, Philippines
Expected Graduation – 2027

Senior High School- Mystical Rose School of Caloocan Inc.
2021-2023

Junior High School - Mystical Rose School of Caloocan Inc.
2016-2021

CERTIFICATIONS & ACHIEVEMENTS

- 2ND Runner Up, Product Expo- ReycEat- Technovate(2026)
- Practical AI Skills for Cybersecurity Professionals- IBM SkillsBuild(2026)
- Cisco Packet Tracer - Networking Fundamentals(2025)
- Oracle Claude Infrastructure 2024Certified Foundations Associat (2024)
- Microsoft Azure: Security Concepts 2021 (2024)
